"This quarter we continued to demonstrate resilient margins, reporting our sixth consecutive quarter of positive gross profit and positive EBITDA. Over the past year, we have strengthened our presence in West Africa with newly secured multi-rig, long-term contracts. We believe the strong demand for our rigs has been driven by our customers recognizing the value and efficiency we have created with our operations and high performance rigs," said Dave Harper, President and CEO of Geodrill. "Despite continued uncertainty in the mining service sector, we believe our strong rig performance and newly secured contracts with senior miners, provides leverage for Geodrill when the market recovers."

Geodrill's condensed interim consolidated financial statements and management's discussion & analysis ("MD&A"), for the three and nine month periods ended September 30, 2015, are available via Geodrill's website at www.geodrill-gh.com and will be available on SEDAR at www.sedar.com.

Non-IFRS Measures

EBITDA is defined as Earnings before Interest, Taxes, Depreciation and Amortization and is used as a measure of financial performance. The Company believes EBITDA is useful to investors because it is frequently used by securities analysts, investors and other interested parties to evaluate companies in the industry. However, EBITDA is not a measure recognized by IFRS and does not have a standardized meaning prescribed by IFRS. EBITDA should not be viewed in isolation and does not purport to be an alternative to net income or gross profit as an indicator of operating performance or cash flows from operating activities as a measure of liquidity. EBITDA does not have a standardized meaning prescribed by IFRS and therefore may not be comparable to similarly titled measures presented by other publicly traded companies, and EBITDA should not be construed as an alternative to other financial measures determined in accordance with IFRS.

Additionally, EBITDA is not intended to be a measure of free cash flow for management's discretionary use, as it does not consider certain cash requirements such as capital expenditures, contractual commitments, interest payments, tax payments and debt service requirements. Please see the Company's MD&A for the three and nine month periods ended September 30, 2015 for the EBITDA reconciliation.

About Geodrill Limited

Geodrill has been successful in establishing a leading market position in Ghana and Burkina Faso and also operates in other West African jurisdictions including Cote d'Ivoire and Mali. The Company provides a broad selection of diverse drilling services, both exploration and delineation, to meet the specific needs of its clients. Geodrill operates a fleet of high performance multi-

purpose rigs, which offer the versatility of being able to perform both reverse circulation and diamond core drilling.
