Dave Harper
Geodril
Accra, Ghana

Dear Dave,

It is with great gratitude that I send this email. The donation of 50,000 Ghana Cedis was such a big help. We were able to settle some of the children's bills which included operations, room, board and therapy.

When polio was eradicated from Ghana, me thought our work load would lighten and we could specialize in one particular aspect of orthopedics. That of course did not happen, it seems like our numbers are increasing. I would like to think it is because with education and seeing other children, people now know that children with disabilities can be helped. We have always believed here at OTC that "All Children Are God's Gift" each child is unique and special and we can offer them and their parents hope for a better life.

You are truly a partner of OTC and together we can change lives.

Enjoy your holiday and hopefully we can get together when I return from my holiday.

Sincerely yours,

Sister Elizabeth
